TECHINICAL BRIEF

Sociocapital Inaugural Launch of a Milestone Health Systems & Capacity Strengthening Project in Nasarawa State

The inaugural meeting of the Nasarawa State Primary Healthcare Health Systems & Capacity Strengthening Project flagged off by the Executive Secretary of the Nasarawa State Primary Healthcare Development Agency marks a significant milestone in efforts to enhance healthcare infrastructure and capacity in the state. The project is a collaborative effort funded by the Bill and Melinda Gates Foundation and Technical Advice Connect LTD/GTE (TACONnect), with Sociocapital partnering with the Nasarawa State Primary Healthcare Development Agency (NSPHCDA) to catalyze positive change and improve healthcare outcomes for communities across Nasarawa.

Nasarawa State has identified significant challenges in its healthcare infrastructure and capacity, impacting the delivery and quality of healthcare services. There is an urgent need to enhance healthcare management, improve monitoring and evaluation systems, and elevate the overall quality of healthcare services across the state.

The Health Systems & Capacity Strengthening Project aims to address these challenges by implementing a strategic framework to improve healthcare delivery. The project focuses on building healthcare management capacity, enhancing monitoring and evaluation systems, and supporting the provision of high-quality healthcare services.

Tasked with resource mobilization, capacity building program supervision, and knowledge sharing, with an 18-month timeline to deliver tangible results, the expected outcomes would entail improved healthcare management, enhanced monitoring and evaluation and elevated quality of services.

Continued engagement and teamwork are critical to navigating challenges and achieving the project's objectives, thereby making a lasting impact on Nasarawa's healthcare sector.
